

WASTE MANAGEMENT

3611 NW 16TH St.
Topeka, KS 66618

City of Holton Residents,

Due to the recent inclement weather, and in an abundance of caution, Waste Management provided an alert informing the City that residential trash collection would be delayed from the regular scheduled pickup on 11/28 to 11/29.

Collection trucks were later sent to town on the regular service day of 11/28, because the collection delays did not occur as expected. Some homes were serviced this day. We recognize this caused confusion and apologize for the inconvenience.

In order to make sure all residents will have their trash collected this week, we will perform an extra collection of all residential trash this Saturday, 12/1. Please use the three-day period before then to share this information, so that all residents have time to be made aware they can put out their carts that day. As always, carts should be placed curbside, at least three feet away from any vehicles, trees, poles, or other obstacles.

Again, we apologize for any confusion.

Sincerely,

Ammon Taylor
Waste Management of Kansas, Inc.
